Very chuffed to have received this today! If you haven't already started collecting points for an IEAA Fellowship, I highly recommend that you look into it as soon as possible. It is a fantastic scheme, and the platform is really easy to use. Huge thanks to the IEAA team for the wonderful work that they do for the sector, but also for advocating for us as professionals. Special thanks to [Peter Muntz](#) for yet another innovative, creative idea - not only beautifully presented but so easy and practical to use.

IEAA Associate Fellow (IEAA-AF) was issued by International Education Association of Australia (IEAA) to Leanne Harrison.

Congrats to [International Education Association of Australia \(IEAA\)](#) for their new industry certification program, and their longstanding efforts to recognise the [#internationaleducation](#) profession and grow career opportunities in the sector. I'm so pleased to be on board as an IEAA Associate Fellow (IEAA-AF) and grateful to all the mentors and colleagues who have been part of my (almost) 15 years in the sector so far.

RECRUITMENT
STRATEGY

MODULE 6:
ADMISSIONS AND
COMPLIANCE
ESSENTIALS

MODULE 7:
UNPACKING
LEARNING ABROAD

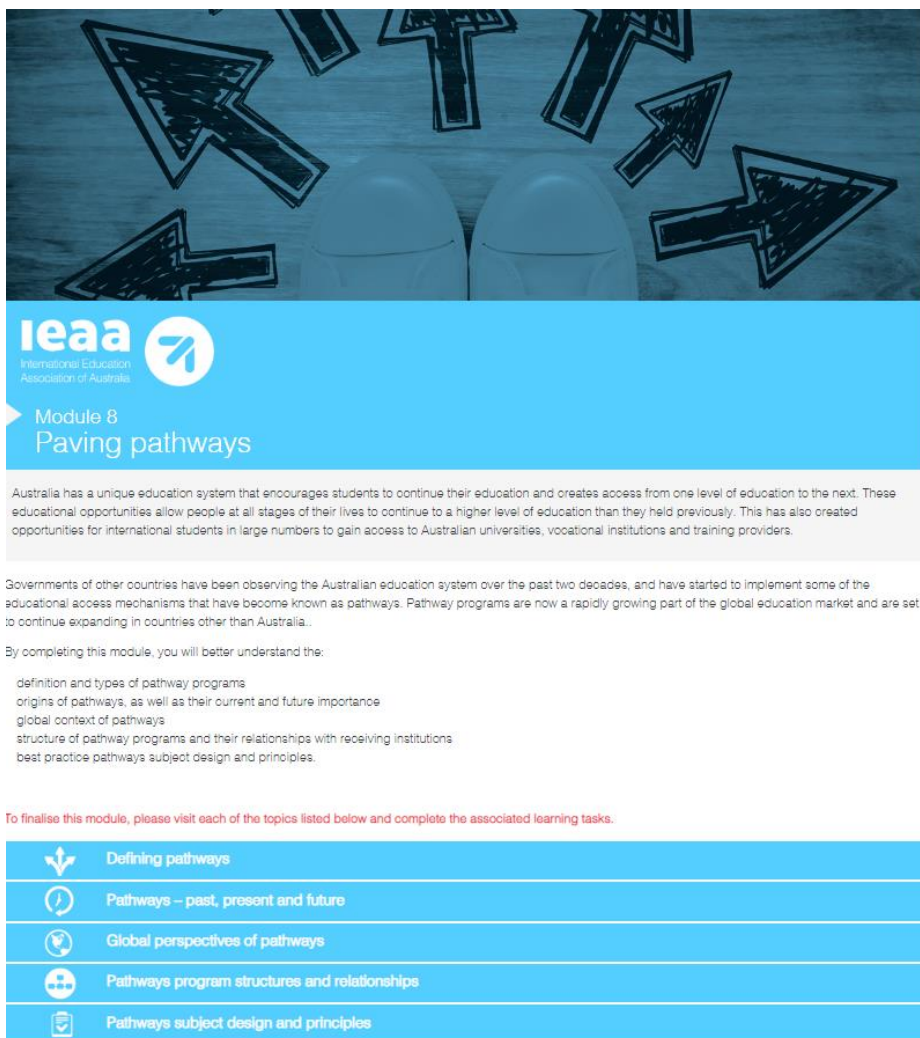

MODULE 8: PAVING
PATHWAYS

MODULE 9:
SCHOLARSHIPS
AND FELLOWSHIPS
FUNDAMENTALS

MODULE 10:
TEACHING AND
LEARNING ACROSS
CULTURES

The slide features a header image with several hand-drawn arrows pointing in various directions. Below this is the IEAA logo and the text 'Module 8 Paving pathways'. The main body of the slide contains a paragraph about Australia's education system, a list of learning objectives, and a list of five learning tasks at the bottom.

ieaa International Education Association of Australia

Module 8
Paving pathways

Australia has a unique education system that encourages students to continue their education and creates access from one level of education to the next. These educational opportunities allow people at all stages of their lives to continue to a higher level of education than they held previously. This has also created opportunities for international students in large numbers to gain access to Australian universities, vocational institutions and training providers.

Governments of other countries have been observing the Australian education system over the past two decades, and have started to implement some of the educational access mechanisms that have become known as pathways. Pathway programs are now a rapidly growing part of the global education market and are set to continue expanding in countries other than Australia.

By completing this module, you will better understand the:

- definition and types of pathway programs
- origins of pathways, as well as their current and future importance
- global context of pathways
- structure of pathway programs and their relationships with receiving institutions
- best practice pathways subject design and principles.

To finalise this module, please visit each of the topics listed below and complete the associated learning tasks.

- Defining pathways
- Pathways – past, present and future
- Global perspectives of pathways
- Pathways program structures and relationships
- Pathways subject design and principles

Topics include:

1. Definition and types of pathway programs
2. Origins of pathways, as well as their current and future importance
3. Global context of pathways
4. Structures and relationships
5. Best practice pathways subject design and principles.
